EDWARD SELDES
(EXCLUSIVE DISPATCH)

PARIS, Sept. 23.—The government has issued a proclamation at the Reichstag, officially announcing the withdrawal of parades. The government also states that measures will be taken to provide martial law and the nationalization of the economy. The situation is described as "grave." The government has decided to save the situation and at the same time to implement economic measures against the rebels.

The rest of all the leading that the passive would win in short order, as the German army has been released from Mountjoy Prison after a hunger strike of a week. He was captured in Alesio Green shortly after the death of Liam Lynch. Eamonn De Valera's chief-of-staff, and since then has been in Mountjoy Prison. Last week he took part in a refusal by the prisoners to carry out certain orders, and with the others was drenched with a fire hose. He went on a hunger strike and thirst strike and was reported Friday to be very ill. Saturday he was taken to the military hospital where his release was ordered. For now, he is still very well, but with his strong constitution it is hoped that he will pull through.

ZONA FLOOD PERIL PAST

of Little Colorado at Holbrook Recede as
State Sends Crew to Rescue

EXCLUSIVE DISPATCH

PHOENIX, Sept. 23.—The Governor's office today received a wire from the State Engineer that the flood at Holbrook is diminishing and that damage appears to be past. The State Engineer has sent to the rescue, headed by State Engineer and District Engineer H. M. Atwood. A pile driver has been started on a diversion plan east of the town, which has been reported damaged. A telegram from both reported damage. A telegram from the river channel is now 200 feet nearer the railroad than a week ago, that the railroad has been washed away. The remaining houses have been swept away, while the business section south of the depot is endangered, should there be a succeeding flood.

The Little Colorado and county are without funds for protective work and State aid is invoked, with suggestion that town or county bonds might be sold for repayment of expenditures.

DAY'S NEWS SUMMED UP

COAL BODY URGES FEDERAL SUPERVISION OF INDUSTRY

Commission Would Put Activities Under Interstate Commerce Rule as Solution to Problem

BY GRAFTON WILCOX
(EXCLUSIVE DISPATCH)

WASHINGTON, Sept. 23.—Government supervision of the coal industry is proposed in the final report of the United States Coal Commission created by Congress more than a year ago to recommend a solution of the vexatious problems in that industry which have been clogging the progress of American business for years. The commission will set up machinery for the governmental control of the coal business through a new division of the Interstate Commerce Commission, which now regulates the railroads.

The proposed new agency, besides being given authority to obtain facts relative to costs, profits, investments and wages under the legislation suggested by the commission, would possess broad regulatory power through licenses over all coal companies and middlemen. Consolidations of bituminous coal companies would be encouraged, but with financing arrangements subject to governmental approval.

PROFITS TAX

Imposition of a graded excess profits tax upon the profits of anthracite coal and upon royalties paid to anthracite land owners is recommended as a means of keeping down prices.

The Coal Commission ceased to exist at midnight last night by limitation of the act creating it. A number of supplemental reports on special phases of the coal problem remain to be issued during the coming week, and the report deals broadly with the general question of the regulation of the industry.

The legislation proposed, according to the belief of members of the commission, will be sustained in the courts, although there is legal doubt as to some points. The commissioners propose to leave the question of regulation on the power of Congress over interstate commerce. Operators, wholesalers and jobbers desiring to sell coal in interstate commerce must obtain licenses.

LEGAL DIFFICULTIES

The commission concedes that there is no authority for regulation of the production of coal in communities. Whether the Supreme Court will take the view that coal production is purely an intrastate matter, as the lower courts have held in the Standard Coal Company case, is one of the doubtful points involved.

There also is a question as to the view of the Supreme Court as to the power of Congress to regulate the coal business. The commission emphasized the public interest of the coal business, declaring that food and water only come from coal as the source of life.

The commission states that the regulation of commerce in coal among the States involves the right to know the cost of production and the investment on which a return is claimed is fairly estimated or inferred, what profits are made by the owner, operator and dealers, and what are the earnings and working conditions of the miners.

The Coal Commission proposes that the Geological Survey shall conduct a general study relative to production of coal, that the Bureau of Mines shall continue to deal with questions relating to safety in coal mining and to quality of coal, and that minimum wage and labor conditions shall be taken care of by some other agency, such as the Department of Labor.

FUEL DISTRIBUTOR

In times of emergency it is recommended that the coal division of the Interstate Commerce Commission should act as Federal fuel distributor.

As a means of checking the over development of the bituminous coal industry it is recommended that the Interstate Commerce Commission shall have authority to refuse permits to railroads to construct sidings to new mines for which there is no real need.

It is also recommended that the Secretary of the Interior similarly shall refuse to issue permits for the opening of new coal mines on the public lands until they are shown in a hearing before the Interstate Commerce Commission that such a mine would serve the public and not require a needless expenditure of money.

Consolidation, grouping or pooling of bituminous mining companies is recommended as a means of securing more steady production, better operating practices, more regular employment and lower costs.

GIRLS' BOYCOTT WINS

(EXCLUSIVE DISPATCH)

DES MOINES, Sept. 23.—Following the example of the boys who boycotted the Northboro schools because there was no athletic equipment, all the girls in school except one have transferred to Westboro, Mo., and Blanchard. As a result O. M. Laflotte, superintendent, has resigned and will enter Drake University here where he will be a student.

To know how good a cigarette really can be made you must try a LUCKY STRIKE.

GOV. HUNT AND PARTY ARE AT WASHINGTON

BY A. P. NIGHT WIRE

WASHINGTON, Sept. 23.—Gov. Hunt headed a delegation from Arizona which arrived in Washington today for a conference with the Federal Power Commission over future utilization of the water power of the Colorado River. Gov. Bryan said, in the only state to sign the River Compact, which did not sign the agreement last year covering the use of the river's power. The delegation will appear before the Power Commission tomorrow afternoon.

TRIO KILLED AT BALLOON RACE START

Casualties Mark Opening of Annual Bennett Cup Clas-s at Brussels

BY GARNETT C. COOPER

BRUSSELS, Sept. 23.—The Gordon Bennett cup classic, the annual balloon race for aeronauts of all countries, which started here today in terrible gales of wind and driving rain, has already cost three lives. Of the seventeen entrants assembled for the race, thirteen are in the air so far as is known.

One of the balloons, reported to be driven by Captain J. G. Grunberg and Lieutenant W. H. Whalen, was killed. The Spanish balloon Polar caught fire and its pilot, Fenaranda, was killed, and his assistant, Gomez, injured.

The American contestant, St. Louis, with which Capt. H. E. Honeywell hoped to capture the trophy, was forced down by the tension of the anchor rope when hit by a half-gale and burst.

The United States Army, S-4, landed in the little village of Grunberg where she was taking off and damaged the Belgian so badly that she had to be emptied of gas for safety's sake.

Because of the atrocious conditions in the United States, A-659, with Lieut. Lawrence in command, had a narrow escape from colliding with others waiting for the start, but hastily dropping her balloons soared high enough to get into the air currents and sail away.

Thus two of the American contestants are striving against three French, two Americans, two Spaniards and two British. The Italian and Polish entries had already been withdrawn.

AMOY, CHINA, IS IN STATE OF TURMOIL

Outside Attack Expected; Continuous Fighting Goes on Within City

BY GARNETT C. COOPER

AMOY, Sept. 23.—Conditions which have prevailed here since August 20, are unchanged with the city today besieged by North Chinese. The Chinese in command, with Lieut. Lawrence in command, had a narrow escape from colliding with others waiting for the start, but hastily dropping her balloons soared high enough to get into the air currents and sail away.

Thus two of the American contestants are striving against three French, two Americans, two Spaniards and two British. The Italian and Polish entries had already been withdrawn.

tramp of fest, the scuffle of the multitude. A siren blares impetuously, calling scores of blue-clad men from the flora, train to where the Thirty-second Destroyer Division awaits. Aboard it are the survivors of the Delphy and the Young. Admiral Coates is there, so is Admiral Hart, commanding the base fleet, Vice-Admiral Cole and Rear-Admiral William V. Pratt. Sumner E. W. Kittel and Ashley H. Robertson and Brig.-Gen. Joseph Pendleton, of the Marine Corps.

Slowly the destroyers, in perfect alignment, steam out to sea. Their decks littered with flowers. The deck is quiet, save for the sound of the waves. Around us are the families of officers and men and the relatives of those who are honored this day.

ISLAND OF FLOWERS

From the bridge of the flagship, we look to the horizon; we feel as though we are bound on a mission where none have gone before. The sun is low, the sky is clear. This ceremony adds a new ritual to naval tradition. Japan and England and our own sailors have long followed it, but the Communists have not.

BOTH ARE ARMED

Explaining yesterday's official warning against a revolution, the foreign office told the writer:

"Communist organizations are numerous. They do not know how many weapons they possess. Nationalist fighting organizations were legally banned, but we know they exist and are active. The Reichswehr, which was once the most powerful, has been disbanded. The Communists, however, are still active. They are armed and organized."

NET CLOSES ON KILLER SUSPECT

Evidence Enmeshes Asserted
Slayer of Peters

Walter Ward Fighting With
Back to Wall

Father Refuses to Come to
Rescue of Son

[EXCLUSIVE DISPATCH]
WHITE PLAINS (N. Y.) Sept. 23.—Fighting with his back to the wall, his blackmail and justification defenses under heavy fire, Walter E. Ward entered the third week of his trial for life before Justice Robert F. Wagner and a jury in extraordinary term here on Monday for the murder of Clarence Peters.

Entangled in a web of circumstantial evidence which the State's powerful prosecution has spun about him and with additional testimony in effort to show his guilt to be introduced, the defendant has been maneuvered into a position where he dare not take the witness stand in his own defense, his chief counsel advised.

Through evidence that Ward's lawyers were forced to present to the jury on Friday, in which it was charged that the defendant had conspired with Charlie Ross and Jack Rodgers to blackmail his father, George S. Ward, president of the Ward Baking Company, to the extent of \$100,000, the State has discovered the defendant's contention that he was the victim of extortion.

The witness whose affidavit contained this assertion says that the defendant was instrumental in the blackmail conspiracy. Atty.-Gen. Carl Sherman believes the father found his son was a party to the alleged attempted "shakedown" and believed for this reason that Ward resented giving up from the side of his son. For if he came into court the father would be forced to take the stand and betray the findings of his investigation, finding additional proof of the falsity of the defendant's story.

The unshaken testimony of numerous witnesses that Peters could never have been a member of a blackmail gang, which had obtained \$40,000 from the defendant and wanted \$75,000 more.

The state's chief lawyer, D. Ward, brother of the defendant, told to Justice Morechauser fifteen months ago that the blackmail plot was based on the relations between his father and his present wife, Mrs. Diana Ledale Ward, has been thoroughly investigated by the State.

[EXCLUSIVE DISPATCH]
DETROIT, Sept. 23.—Parts of Detroit were drenched in a tremendous downpour of rain.

Streets in the southeastern part of the city were under several feet of water. At one place four houses completely submerged.

Lightning tore a hole in the wall of the home of John Schaeffer, jeweler. Another bolt tore a hole in the roof of the home of R. T. Malcom.

Members of the India polo team

were maimed of fifty-four and one-half inches in length with a very sharp-pointed American polo stick.

Five players suffered maiming of fifty-two inches long enough, the average being about fifty-one inches.

Whiting-Mead Cubs Lose to Woodmen in Fourteenth; Montebello Wins

FREMONT SQUAD NABS LONG TILT

Vierth Bests Howard After Pitching Battle

Three Scores in Fourteenth Settle Struggle

Woodmen Finish on Top by Count of 5 to 2

After Vierth and Howard had battled thirteen innings in the fourteenth, the latter blew up and was touched for three hits and three runs in the fourteenth and the Fremont Woodmen defeated the Whiting-Mead Cubs, 6 to 2.

The Whiting-Mead team got out one wonderful ball and until he cracked in the fourteenth, Howard had slightly the better of the mound due as he had allowed but five hits in thirteen innings while his mates had given Vierth two bobbles in thirteen frames. Both teams collected eight hits apiece during the lengthy struggle.

FREMONT IN LEAD

Fremont took the lead in the fourth frame when it bunched two hits and one of the three walks issued by Howard for a brace of tallies. Then in the twelfth, the others scoreless from then until the big blow-off in the fourteenth.

The Cubs came back in their half of the fourth and got one of the two hits back on the day, and Lawson, the former scoring. In the seventh the Whiting-Mead squad tied the going in a double-bow knot by nicking Vierth for the second hit allowed during the struggle.

MOW DOWN BATTERS

From the strength on both Vierth and Howard mowed the opposing batters down in one-to-three order most of the time. Although there were couple of singles allowed by each hurler, neither side had a chance to score in the first or second frame, and the Woodmen got to Howard for three runs in the fourteenth. Then in the fatal fourteenth, Howard cracked in the stars and Franklin, Hayes and Phillips crossed the plate. The Cubs attempted to start a rally in the half of the fourteenth but Vierth tightened up and crushed the Cub attempt to score.

The hitting of Radkin, Vierth, Howard, Lawson and Molitor featured, while Hay's work in left field was spectacular. Score:

desde a nuestros numerosos amigos de habla española. A cada uno de los lectores americanos del Times que estudian esa parte del futuro progreso de Los Angeles, que es la de los Estados Unidos más cercana se halla a territorio americano, habrá de depender de las relaciones que logremos con nuestras hermanas, las repúblicas del sur. Para que el entendimiento cordial, que hoy nadie tan importante como los ciudadanos se familiaricen con la lengua castellana. Tan pronto como este hecho nuestros habitantes, que hay al presente en estas personas que guardan español en Los Angeles. A ellas les dirémos diariamente esta columna en castellano, con las más importantes noticias de última hora.

cional democrático insiste en que debería convocarse al congreso a sesión extraordinaria para ayudar a los agricultores.

Obrerón Enfermo

Ciudad DE MEJICO, Sept. 23.—El Presidente Obrerón ha estado hoy recluido en sus habitaciones por causa de enfermedad. Aunque no pudo atender sus asuntos oficiales, dijo que no era grave su dolencia.

Los Aviadores Mexicanos en Peligro de Muerte

CIUDAD DE MEJICO, Sept. 23.—Los aviadores mexicanos, los T. Yáñez y Lázaro, estuvieron hoy a punto de perder la vida, tratando de sentar un record mexicano de altura, pues perdieron el controlamiento a una altitud que intrépidamente registraron como de 26,000 pies.

A la altura dicha, perdió la máquina todo gobierno, y había descendido 20,000 pies antes de que se dictara una orden de que prohíbe la exportación de artículos alimenticios y de primera necesidad a Méjico.

que sería administrada por una división de la Secretaría de Comercio entre EEUU y Méjico.

Ahora que ha comenzado a entrar en vigor el acuerdo, se ha hecho al Departamento de Tráfico un nuevo plan para liquidar la flota del gobierno, se ha iniciado una lluvia de protestas en la Casa Blanca, contra el manejo directo de la flota por el gobierno.

El Presidente del comité nac-

ional de Washington, D. Beach y Seal Beach; y W. D. Woodstock, de la Avenida South Griffen, 146, que fue mazado por un trío cerca del puente de North Beach.

Fue agravio el accidente que hizo perder la vida a Hutchinson. Iba en un auto que conducía Harry Williams, empleado de un peródico de Long Beach, y se dirigía a Seal Beach en compañía de la Dra. Williams. La Dra. Arthur O'Connor, de Santa Ana, la Brita, O'Brien, de Hollywood, y Joe O'Hara, de la calle South Hope 427. Tanto Hutchinson como O'Hara eran empleados del departamento de circulación de un periódico de Los Angeles.

Inmediatamente después del puente nuevo de la carretera del Estado, en Naples, el coche, que iba muy aprisa, volcó, enderezándose de nuevo, y auto continuó se desplomó muerto. En el hospital vieron que tenía el cuello quebrado.

Se Apoderan de un Auto unos Saltadores

A. W. R. Hyland, de la calle Park Front, El Vene, le apoyaron para revolver en su casa y lo obligaron a ayer temprano a conducir su coche desde las cercanías de Venice hasta Montebello, donde le robaron el auto, y su compañero y él fueron despojados de joyas por valor de varias mil libras.

Califia la policía que la pérdida total asciende a \$3000.

Los atracadores eran dos individuos armados, según dice el parte. Después de haber obligado a Hyland, que iba marchando lentamente, a que parara el coche,

subió la pareja al asiento de atrás y le dieron orden de que siguiera caminando. "Hacia donde?" pregunto Hyland, que se hallaba en estado momentáneo de ceguera, ya que va de Venice a Redondo.

"Nosotros te diremos donde has de detenerse", contestó uno de los ladrones, "y no se pare hasta que se lo digamos, ni trate tampoco de hacernos malas jugadas."

El punto terminal en Montebello, cerca de Whittier, y allí tuvieron que apartarse por la fuerza Hyland y su compañera, cuyo nombre no fué dado a la policía. A la señora le quitaron los lujos de su noche, y se llevó un anillo de oro y diamante, otra con zafiro y diamante, un reloj pulsera de oro, cuatro brazaletes con piedras, y un maniquí de sorra plateada. A Hyland le quitaron un afile de cortar con mango de oro, un collar de oro \$25 en efectivo, y el auto se que desaparecieron.

DEPORTES

Natación

La noche del próximo miércoles, a las ocho, celebrará el Club de Natación del Pacífico en la piscina del hotel de ese nombre, un gran festival náutico, con doce pruebas en el programa.

El concurso, organizado por el Instituto Franklin, director del club de natación en el Ambassador, promete ser uno de los mejores de la temporada. Cordialmente se invita al público a presenciar estas pruebas.

Baseball

Los Angeles fué vencido por Salt Lake City en doble partido jugado ayer tarde en el parque de Salt Lake. Vernon le ganó a Port-

land los dos juegos en el parque Washington, por 4 a 3 el primero, y por 6 a 1 el segundo.

Golf

NUEVA YORK, Sept. 23.—Jugadores profesionales de golf de todas partes de los Estados Unidos se reunieron a inscribirse para el torneo anual que se abre mañana en el Club Campesino de Pelham, Pelham Manor, N. Y., y en el que dispondrán el título americano de profesionales de golf.

PREVENTION OF FIRES SOUGHT

EL CENTRO, Sept. 23.—El Centro citizens will celebrate National Fire Prevention Week, Oct. 7 to 13, by having a general cleanup up of the city. James E. Ford, chairman of the civic Improvement committee of the Chamber of Commerce, has announced a campaign to clean up yards and alleys and eliminate rubbish in alleys and remove fire hazards.

Boy Scouts, Rotary Club, school children and civic organizations are to be asked to aid in the plan.

Fire Chief Charles F. Ferguson said all persons in conditions that cause fire risks and will direct their removal.

AUTO CRASH CURB SOUGHT

EL CENTRO, Sept. 23.—Following numerous accidents on the ten-mile stretch of highway connecting El Centro and Calexico, Sheriff Elliott has announced that he will direct officers to pay strict attention to enforcing the traffic law. Several wrecks have been made in the last few months involving automobiles while intoxicated. This is pointed to as one of the primary causes for accidents. Violators of speed laws are to be punished severely.

It is recommended officially, that they hope to make this road much more safe.

BANDIT BULLET FATAL

CALEXICO, Sept. 23.—G. E. D. Williams, who died at Los Angeles County Hospital Thursday, was the victim of unknown bandits who held him captive over here last year. There had been numerous reports of holdups and house-breaking in Calexico, and Williams, a jeweler, observing two men near his shop, a short time ago, and questioned them. One of them fired at him, the bullet lodging in the spinal column, causing paralysis which made him an invalid. Williams was not connected with the police department, but as a citizen was endeavoring to aid in driving criminals from the city.

LEGION TO CELEBRATE

CALEXICO, Sept. 23.—Members of the American Legion here are preparing for the Armistice Day celebration on November 11, when it is proposed to entertain Legion members from the valley. The Chamber of Commerce will be asked to aid in plans for entertaining visitors.

The recreation center established last spring under direction of the Legion is to be dedicated to the Armistice Day celebration.

picnic and tournament of sports at the center on October 4. C. S. Anderson has been appointed chairman of a committee on arrangements.

Other members of the committee are Keith Harrington, Randolph Henderson, Thomas Hutchinson, Sam Dick, George Polis and James Otter.

WATER WATER KEPT PURE

BRAWLEY, Sept. 23.—Health authorities of Imperial county have started an investigation concerning the domestic water supply as pure as possible and rigid prosecution of violators of sanitation laws are being made. Frank J. Pfeifer, Agricultural extension agent by Justice of the Peace Griffin for permitting the body of a sheep to remain in an irrigation canal. Neighbors identified the animal as one owned by Readel, who declared that he didn't know it was dead. Justice Griffin said Readel should have kept the sheep out of the canal, dead or alive. The event shows that several families farther down stream had had their health endangered.

PUPILS SURVEY CROPS

BRAWLEY, Sept. 23.—As part

of their training, three pupils attending agricultural classes in Imperial Union High School are making a survey of crops and plants growing in Brawley district.

Their plan calls for making a complete report on each crop, orchard and vineyard in cultivation.

The surveyors are Oscar Cramer, Charles Cordill and Lawrence Barfell and their work is being done under direction of Dr. G. S. Johnson, supervisor of agriculture at the school.

INVESTIGATION UNCOMPLETED

BRAWLEY, Sept. 23.—Imperial Valley date growers have openly challenged E. T. Kaiser, state Real Estate Commissioner, who has sent word that he will be in the valley next week to investigate

one of so-called date lands and orchards.

They assert that the commissioner is welcome to investigate all orchards here and that he will find them as represented.

The commissioners are reported to have received complaints that several small date orchards sold in the valley contained seedlings of questionable value.

SCHOOL ROW SETTLED

IMPERIAL, Sept. 23.—School authorities here are still disputing in relation to the segregation of school children here, threatened by members of the colored race, have been meeting.

A school board, where children of colored families were directed to attend. Several of the youngsters visited the schools which they had attended formerly and were given transfers to the new building.

Some transfers were destroyed by the youngsters and they refused to go to the new building.

Several conferences were held between school officials and parents and further trouble is believed to have been avoided. Facilities at the new school are described to be equal to complete and efficient as the other buildings.

ENROLLMENT LARGE

CALIFORNIA, Sept. 23.—Californian schools enrolled 235 pupils at the opening of the term and this number is expected to be increased with the return of vacation.

The school board announced the arrangement of the following teachers in Calipatria schools:

F. E. Kramer: Miss Kramer.

Miss Riley: Mrs. Johnson.

Miss Tripp: Mrs. Nelson.

Miss Spald: Mr. Clark.

Principal: Bonita: Mrs. Jones.

Winter: Mrs. Linister.

Northend: Mrs. Miller.

Zschongler: Mrs. Eddins.

PASTOR RESIGNS

CALIPATRIA, Sept. 23.—Rev.

Hannan, pastor of Union

Congregational Church, has an-

nounced his resignation to take

effect October 1. He has not de-

clared his plans subsequent to leaving Calipatria.

"Is Your Husband
Getting Bald?"

If your wife and friends have begun to notice the thin spots in your hair—get busy!

Premature baldness is no joke. It means that you lose the appearance of youth and vitality, it means that people unconsciously classify you as one of "the older men", it means that if your hair has started to slip you should begin the use of Newbro's Herpicide.

Herpicide prevents hair loss by destroying the cause and it permits the hair to grow as nature intended. As a hair saver that gets results Herpicide has no equal.

For an interesting booklet upon "The Care of The Hair" and a small trial bottle of Newbro's Herpicide send ten cents in stamps or coin to The Herpicide Co., Dept. 40, Detroit, Mich.

Devoted exclusively to local conditions.

Insist on Board Fire Insurance

Co-operation...

EVERY time you try to prevent fires you are helping yourself by reducing the loss by fire.

A lower burning rate over the entire country will show itself in lower fire insurance rates, for the one determines the other. Another burden that the fire loss puts on you is economic. Fire insurance distributes the loss but it cannot replace the property. That is gone forever.

The companies are doing all they can to cut down losses. Do your share too.

NEGRO HELPFUL TO MRS. STOKES

Admits He Was Hired to
Secure Affidavits

Says He Doesn't Know if
They Were True

Talks After Prosecutor
Raids His Home

(EXCELSIOR DISPATCH)

CHICAGO, Sept. 23.—The efforts

of Mrs. Helen Elwood Stokes,

beautiful wife of W. E. D. Stokes,

millionaire publisher and hotel

owner, to prove that her husband

has made a deliberate effort to

blacken her name took a turn

toward the sensational today

when Assistant State's Attorney

Charles S. Wharton questioned

Robert H. Lee, a colored man. The

case, which involved demand crimi-

nal prosecution against Mrs. Stokes

and her son, was adjourned.

Lee, in his statement to the as-

sistant prosecutor, said that he

had been hired by Mr. Stokes' at-

torney to secure affidavits from

men who would testify that

Mrs. Stokes had been a close

companion of Wallace Tyler, a col-

ored man.

The questioning of Lee followed

a motion made upon his behalf by

Mr. Wharton and denied by

the court, which held that

they were irrelevant in this case.

Persons who knew Mrs. Stokes as

Helen Elwood, as Helen Under-

wood and as an inmate of the

Everleigh Club, were called to the

barrel room and were asked to give

information about the Stokeses.

"In July of this year I was ap-

proached by Attorney Daniel Nu-

ll, of New York, who told me

that they were interested in finding

persons who knew Mrs. Stokes as

Helen Underwood and as an inmate

of the Everleigh Club," Lee said.

"They called me to the barre-

l room and asked me to give them

information and gave me \$75 in

advance. With a friend, John Scott, I located six persons who

said they knew Mrs. Stokes and

she was a good woman.

"I went to see Mrs. Stokes and

she was a good woman.

Angeles People?

late, upsetting blood and nerves. The effect of this body-poisoning is quickly apparent. Your back aches; you suffer sharp, stabbing pains at every sudden move; your head aches; you have dizzy spells and there's apt to be some annoying bladder irregularity. It's no wonder you feel weak, irritable, nervous and depressed.

But why continue in this miserable, half-diseased condition? Why not help the kidneys before the trouble gets a firmer hold? Deterioration means drapery, gravel or fatal Bright's Disease. Begin using Dean's Kidney Pills. Dean's Kidney Pills have helped thousands. They should help you. Ask your neighbor!

These Los Angeles Folks:

MRS. M. P. COOVER, 727 E. Washington says: "Hard work around the house aggravated pains in my back. My back would stand up for a few days beyond going. This suffering put me in a nervous condition and weakness made me miserable. Then I took Dean's Kidney Pills a fair trial and in a short time they brought relief. I can't say enough good things about them. I take Dean's with the result that my kidney and its annoying symptoms were banished."

NEW CALIFORNIA BANK ADDS LUSTER TO LOCAL FINANCIAL DISTRICT

Latest Additions to Los Angeles' Growing "Wall Street"

RESIDENTIAL HOME OFFICE
IS READY FOR BUSINESSSPECIAL HUB REINFORCED BY STRONG
BANK; DESCRIPTION OF PLANT;
STORY OF DEVELOPMENT

in the financial and business growth of the city, the California Bank today offers to the public its newly appointed modern new home at 625 South Spring street. At 10 o'clock the doors of the big institution will open to business and to welcome the depositors and visitors who will take advantage of the opportunity to inspect a building first hand. Plans have been carefully worked out so that it is possible to inspect at close range the equipment and appliances of the new California Bank's home, which is designed to embody the latest improvements and features of construction.

A strong armed corps of men will be on hand to conduct through the banking plant and thoroughly acquaint visitors with the details of the bank's operations. In every manner it is intended to look into the massive structure and make it accessible to the public. The California Bank's new home will find down stairs the arrangement of the bank's main office and appointments made by a leader in Los Angeles and Southwest. Every detail of the comfort and convenience of the bank's depositors has been considered in the structure and has been designed with this character in mind. The arrangements, waiting rooms, comfortable restrooms, with the aim of placing business and making business as easy and interesting.

The products of nature today will be in evidence typical of the friendly spirit of the bank and attitude toward the public. The bank's plan of service—heavy emphasis on safety. The bank occupies a leading position in Los Angeles banking circles. Its depositors number over 140,000 and the bank's assets are now \$45,000,000. Thirty-five banking offices with local management, but under the direction

LAST WORD IN LIFTS

Elevator System in California Bank Building Fast, Safe and Perfectly Equipped

Attaining a speed of 650 feet per minute the elevators in the new California Bank Building, located on Spring street between Seventh and Eighth streets, now hold the distinction of being the fastest, and at the same time, the safest elevators in the city.

Pushing in elevators, like fashions in clothes or anything else change, according to J. J. Grady, elevator engineer of the Baker Iron Works of Los Angeles, which firm furnished the three elevators as well as the structural steel in the new Bank Building, and the California Bank Building's elevators represent the last word in building motivation.

The elevators are operated by the Ward-Leonard system of control, which is considered the best in the field of elevator locomotion. This system is especially adaptable to Southern California, where alternating current is used for electric energy. The Ward-Leonard system converts the alternating current into direct current through a generator equipped individually on each elevator, thereby reducing the cost of operation by 20 percent as well as increasing the flexibility of speed and ease of operation and control. The speed with which elevators are operated by this system is almost without limit. State laws, however, regulate this speed and the 650 feet attained by the California Bank cars is

practically the limit for metropolis office buildings here, while 700 feet is said to be allowed in express cars.

Practically every known device for safety is also included in these modern cars. Electrically locked doors see to it that the cars will not operate either up or down until the doors are closed and locked. A governor, attached to each car, stands guard, ready to stop the safety locks should the speed of the car pass the 700 feet per minute mark.

Electric dynamic brakes are ready to function should the power fail or through a break in the transmission line. While safety magnetic brakes are used in starting and stopping each car. Great oil buffers, which will bring the car to a standstill within two feet, stand guard in each elevator pit in case the car should drop between the ground and second floor.

The starter is equipped with a set of electric communication buttons and an electrically-lighted signal system so that he knows at all times the location of each car and can communicate with the driver of each car. Colored lights indicate the floor and direction of the cars, while still other

CALIFORNIA SECURITIES

The California Securities Company was incorporated in September, 1922, to fill a vital and important place in the rapid development of the California group as a leading banking institution in Southern California. Its ownership is vested in the stockholders of the California Bank, the capital being deposited in trust for the benefit of the bank's stockholders.

The company was organized to handle as a corporate entity the business formerly conducted by the bond department of the bank and has made a remarkable growth in the last twelve months.

investment issues is handled by the company.

corporation, municipal, and government bonds constitutes a big volume of the company's business.

Another phase of the com-

SERVICE IS KEYNOTE OF SUCCESS

Executive Lays Down a Precept, and Tells How Well It Works

The ideal of rendering honest, courteous and conscientious service to the public by a group of energetic, ambitious, capable men is the way. A. N. Kemp, vice-president of the California Bank, followed this precept and this influenced the policy that has been substituted to a position of leader in the Southwest, with thirty-five branch offices, 140,000 depositors and nearly \$35,000,000 in depos-

its.

"The slogan, 'Courteous Service and Square Dealing,' has been adopted as our creed in our relations with the public," said Mr. Kemp, in discussing the amazing growth of the bank, which is one of the new California Bank Building in the center of the Los Angeles financial district.

"A statement recently was made by A. M. Chaffey, founder and president of the Howard-Caffey Company and new president of the California Bank, that the public gains its impressions of the bank through contact with its representatives and that the bank's established policy of courteous service and square dealing rests with the employees.

"Thus, in thirty-two words, it is the sum and substance of every lesson on public relations that can be taught.

"The California Bank has sought to affiliate with its organization able, capable young men who have vision to build for future and make this institution one that will set a pace of development in banking that is in keeping with the steady, onward march of the entire community.

"We have a desire to inquire for men of this type. The California Bank stands today a dominating institution managed by wide-awake men in the prime of manhood or on the threshold of the greatest period of their business activity.

"On our interpretation of this business creed as exemplified by honest, courteous and conscientious service to the public. The bank strives to give proof of its bank as concrete evidence of the soundness of our tenets of policy."

Keeping Pace

THE GREATNESS of any institution is measured by its growth. The History of the California Trust Company has been one of most consistent, steady and unprecedented advance, meeting each new opportunity to serve with unhesitating enthusiasm. With the opening of the new offices, a still more efficient and effective organization is possible.

IT WILL BE A PLEASURE to renew old associations and to establish new friendships on the occasion of the opening of this, our future home.

California Trust COMPANY

Spring between Sixth & Seventh

View of the new quarters of E. H. Rollins & Sons on the tenth floor of the new California Bank Building. The woodwork is in Flemish oak with desks and other furniture to correspond. The executive offices are on the Spring-street side with filing rooms, library, etc.

The new offices of E. H. Rollins & Sons, located on the tenth floor of the California Bank Building, will give the firm greater opportunity for service to its large clientele in Southern California.

This firm, which is the pioneer national bond house in California, was founded in 1878 and offices were established in San Francisco in 1894. California securities were little known among investors in other States in those days and the Californians with funds to invest were apt to let the income yield that goes with the security of a good investment.

Hydroelectric development was in its infancy and few people believed that power produced in the Sierras could be transmitted over long distances to San Francisco and Los Angeles. This end house was the first to finance hydroelectric transmission of hydroelectric power, taking an active interest in the original development of the Great Western Power Company which after became the Pacific Gas and Electric Company system. It has also taken part in the financing during the last thirty years of the Southern California Edison Company, Los Angeles, California-Oregon Power Company and others.

The House of E. H. Rollins & Sons has representatives in more than sixty cities and major offices are maintained in the principal financial centers of the United States.

Mr. Donald O'Malley, vice-president, is in charge of the local organization, which includes Wallace A. Marshall, treasurer; Frank H. Boddy, municipal bonds; A. E. Burton, cashier, and Richard S. Davis, sales promotion and advertising.

BANKS MOST IMPORTANT SUBSIDIARY

Backed by an Ideal Its Founders' Dreams Have Been Justified

In February, 1921, the California Trust Company was organized. Its entire capitalization is owned by the California Bank.

At the time of organization G. Allan Hancock was chosen president and that office is still held by him. Leo S. Chandler was named native vice-president in charge of the trust company.

It is evident that the California Trust Company is a distinctive organization in banking circles, inasmuch as it is engaged in trust business only and does not conduct banking or investment business itself.

One canon of the company to which its officers attribute a good portion of their growth is a

"I chose the STEARNS-KNIGHT with its sliding-sleeve valve motor, because of its extreme quietness, ease of riding and flexibility."

of the head office, serve outlying sections of Los Angeles.

The motto of the institution is "Courteous Service and Square Dealing." One infallible canon of the bank is to render the same cordial service to all whether the customer be an influential captain of industry or a school child with his small savings account.

The California Bank is unique in being the first of the great banks of Los Angeles to have an office building of its own, but so carefully has the architecture been worked out that perfect banking quarters have been obtained at the same time the additional cost of building on a corner has been eliminated.

The bank in this location is the

natural hub of Los Angeles' growing financial center. Situated as it is in the heart of the business district between Sixth and Seventh streets on Spring, every facility of Los Angeles' "Wall Street" is at hand.

But two doors away in the Stock Exchange, and within the merchant's walk, are many bond and investment houses and other banks.

A. M. Chaffey, as president of the California Bank, is the dominating personality in the California group. Like one of the early pioneers of California, he came here with his parents from Toronto, Canada, in the year 1881, his father being one of the founders of the city of Ontario. Mr. Chaffey, who is one of the young men among the leaders of the Southwest, has been identified with banking in and about Los Angeles since his early youth, and the success of the California group is largely attributable to his foresight and ability.

Following Mr. Chaffey, in direction of the California Bank, is

A. N. Kemp, who was vice-president in charge of finances of the company established an enviable reputation amongst the younger financiers of the community.

While an active vice-president in the bank, George A. J. Howard, president of the California Securities Company, and specializes in that branch of the California group.

In a similar manner, Leo Chapman is an active vice-president of the California Trust Company.

With the title of Vice-President, He is also a Vice-President of the California Bank.

A. E. Huntington, a vice-president of the bank, devotes his attention particularly to mortgage loans and real estate matters, and has general supervision of the credit department, in which he is assisted by one of the newer vice-presidents, G. L. Alexander.

Vice-President James Forsythe supervises the bank's foreign department, with particular attention to Mexican business, which is developing in line with the rapid improvement conditions in that country.

In speaking of the executive personnel of California Bank, Mr. Chaffey said: "Regarding in addition to the present needs for conservative banking management, the tremendous future certainties in Southern California, it has been our aim to build up in the California group a strong organization of capable, conservative and energetic men of the younger generation who will be able to grow and keep pace with the community. This, I think, we have accomplished in our organization, while maintaining a high degree of conservative judgment and clear thinking."

A pound of peanuts is said to contain more protein of body nutrient than a pound of sirloin steak; and nearly twice as much heat and energy producing nutriment.

Your Valuables Will Be Safe Here

Safe-deposit facilities of the most complete and concrete nature and receptacles as they can possibly be offered are the public facilities and surrounding areas of the new building and surrounding areas of the California Bank. Steel doors and heavy steel safes and concrete vaults of the largest size are the main features of the new building. Within these rooms, where valuables may be left safely, guards are on duty night and night. At night, under regular alarm and burglar alarm system, there are alarm systems for use of business firms and persons who have large quantities of jewelry or securities to deposit.

The entrance to the vault and safe-deposit department is obtained through a marble stairway leading down from the main banking room, besides the many boxes, ranging in size from small individual receptacles there are safe-deposit boxes for use of business firms and persons who have large quantities of jewelry or securities to deposit.

The special facilities that have been provided for investment houses, whereby their securities and other valuable papers may be filed and cared for, is unique. Embroidered with the latest protective designs, each safe-deposit box, which also weighs one ton, contains

kitchen that are provided with all the necessary appliances that are found in a modern-day hotel.

An additional dining-room of smaller size is provided for senior officers of the bank. This feature was installed in order to make it easier and convenient for the bank officials to entertain business matters while lunching or dining and at the same time to provide a place where officers may take friends and clients to talk business during a sociable meal.

ARTISTIC FURNISHINGS

One item of equipment having much to do with the artistic beauty and receptive atmosphere of the building and its offices comprises the furniture, rugs and hangings. Most of the furniture was made to order out of wood that harmonized with the architectural design of different rooms. Every article of equipment in the new home of the California Bank was especially manufactured or bought to fill its niche in the scheme of making this bank a truly home-like place in which to transact business.

To George A. J. Howard, vice-president of the bank, is given a large portion of credit for the successful completion of the new home and its many attractions. The duties of handling the details of arrangement and construction incidental to the building was placed in Mr. Howard's hands.

Mayors Fine Self \$25

The Mayor of Harrisonburg, Va., John Morrison, recently charged himself in formal court with reckless driving and fined himself \$25, which he paid to the City Treasurer. The trial grew out of an accident in which the Mayor's car ran into a mail box and injured a man who was mailing a letter. The Mayor waived the question of jail sentence and costs but but promised to pay for the damage to the mail box. [Pathfinder.]

Mine and Oil Notes From Far and Near

SHIPMENTS OF CRUDE INCREASE

Daily Average Gain Double
Previous Week's

Total of 3,304,480 Barrels
Cleared at Port

Forty-seven Tankers Sail
From Harbor

An average daily increase twice as large as that registered during the previous week was noted in the amount of crude oil shipped from Los Angeles Harbor during the week ending the 1st, inst., with a total of 3,304,480 barrels of crude oil left the port.

The average daily shipment was 472,885 barrels, an increase of 41,000 barrels over the daily average of the preceding week, which was 431,602. Last week the gain in average daily shipments was 29,000 barrels.

The total amount shipped during the week ending September 14 was 8,021,316 barrels. Forty-five tankers steamers transported that amount of oil while during the week just ended forty-seven tankers left the harbor.

Twenty-four of the tankers were outbound for Pacific Coast ports, nineteen for the Atlantic coast and four for foreign ports. The shipments were as follows:

SEPTEMBER 15
W. F. Russell for Philadelphia, 56,000 barrels
crude for Pan American Petroleum Corporation
O. C. Standard Oil Company, 56,000 barrels

What Has a Bond
House to Sell?

For more important than the securities
themselves which a bond house sells its
clients is the investment service that goes
with the securities. The investor can buy
practically the same bonds from any repu-
table bond house, but unless his purchase is
accompanied by a service lasting until the
maturity of the bonds he is not getting all to
which he is entitled.

Our service department has
kept pace with the growth of
our business and we are equip-
ped to render an unexcelled in-
vestment service.

REVEALS WRECK DETAILS TODAY

Ill-fated Squadron Commander to Take Stand

Promises to Withhold Nothing to Clear Mystery

Capt. Watson to Testify at San Diego Quiz

By a "Times" Staff Correspondent

SAN DIEGO, Sept. 23.—Before the naval board of inquiry into the wrecking of destroyer Squadron No. 11 upon the rocks of Honda Bay two weeks ago, Capt. Edward H. Watson, commander of the group of ill-fated ships, tomorrow will tell the full story of just what happened.

In his relation every occurrence from the receipt of the original order, which called for the ships to sail southward, down through the navigation operations to the scenes which ensued after the pile-up on the crags will be told.

This story, the cause of the shrapnel sequence will be in answer to questions by his counsel.

"Nothing will be withheld," he said tonight. "The good of the service demands that the questioner should be given the whole fact. Things have gone too far now for any fact no matter how important to be kept from the board. I believe every officer believes in the traditions of the Navy. I believe those traditions should be upheld to the utter exclusion of personal consideration. I have been trying to uphold these traditions for many years. I cannot backslide now."

There is something pathetic in this grizzled sea captain whose record goes back to the days of the Spanish-American War and who, as a young ensign, fought for Farragut in the battle of Manila Bay. One feels in talking to him that whether or not he made a mistake, whether the blame is attached to this disaster is attached to him or to the other members of the squadron, his heart and soul are probably his very existence, are wrapped up in the Navy which he has served so long and so honorably.

It is apparent in his voice and in his bearing that he would sacrifice everything he has that the "service" should not suffer.

Personal considerations, the fact that his Alberto spotless record was to be reviewed, did not really have any weight with him.

At the opening of court tomorrow, Judge Advocate-Commander Leslie Britton will take the witness stand and moments later present to the court in evidence all of the documents salvaged from the wrecked ships. Then will come Capt. Watson's story. Unless present plans are changed Capt. Watson and Commander Donald F. Hunter, commanding officer of the Delphy,

BELIEVES DAUGHTER KIDNAPED

Fifteen-Year-Old Girl Last Seen Tuesday on Her Way to School

Mystery surrounds the disappearance six days ago of Juanita Rose, pretty 15-year-old school girl. With her class books under her arm, she was last seen by her mother, Mrs. David B. Rose of 1437 Oak street, as she left home for school. Tuesday morning inquiries resulted in the information that she never reached her presumed destination, and although the police were notified that night nothing was done to locate her. Her disappearance was not made public until yesterday.

According to Mrs. Rose, her daughter had no boy friends, she had been home alone since the month ago from Paterson, Tex. It is Mrs. Rose's belief that the girl was kidnapped, but police investigations have not definitely decided upon the father.

Mr. Rose is the girl's step-father. Her own father lives in Paterson, Tex., and since she has been in Los Angeles, but a month, police believe Juanita must have been sick and returned to her former home. Both Mr. and Mrs. Rose, however, accept that possibility, and that she was reacquainted with them in this city. Telegrams have been sent to Texas in an endeavor to ascertain whether she is there.

Juanita is 5 feet and 3 inches in height, weighs 100 pounds, has dark hair and eyes, and a complexion. When last seen she was wearing a white dress black satin slippers, tan stockings and a tan hat with a lace streamer.

Wife of Appel Returns, Faces His Creditors

EXCLUSIVE DISPATCH

CHICAGO, Sept. 23.—Mrs. Charles Appel, mother of Lila Lee, the motion-picture actress, and wife of the manager of the North Shore Yacht Club, returned to Chicago today after three weeks in California, to take up the cudgels for her husband, who went to join her several weeks ago, leaving a warrant for larceny at batles and a sum concerning a \$125,000 house fund.

Mrs. Appel said she came back to deny the house-fund rumor, to deny she and Mr. Appel had ever separated, and to assure all of her husband's creditors that he will soon be back in Chicago to face them.

GOOD ROADS CAMPAIGN (EXCLUSIVE DISPATCH)

LOUISVILLE, Sept. 23.—More than \$600,000 of money of them women, will be actively working in every precinct in the State for passage of the \$50,000 road bond issue when the organization recently formed is completed, according to the campaign plan of the Kentucky Good Roads Association.

wait too long

The effort cost her a good deal of pain. Disregarding his shouts she persevered until she stood safely on the sand. Then saucily waving a farewell, she set off toward the cave.

Had she seen the look of terror which settled on Jim's face as he tried to keep to his task of guiding the raft ashore she might have wondered what it meant in any case she would certainly have behaved differently.

By the time the sailor had safely guided the raft ashore, Jim had cooked their midday meal. She achieved a fresh culinary triumph. The eggs were fried!

"I am seriously thinking of trying to boil a ham," she stated gravely. "Have you any idea how long it takes to cook one properly?"

"A quarter of an hour for each pound."

"Admirable! But we can measure time in hours and pounds."

"I think we can do better. I will construct a balance of some kind. Then, with a ham slung to one end, and a rifle and some cartridges to the other, I will tell you the weight of the ham to an ounce or two, and then I will be ready determined to fashion a sun-dial. I remember the requisite divisions with reasonable accuracy. However, to measure you, I will go back quickly. If I fall a second time you will still be able to replace any deficiencies in our balance."

Before he could protest she started off at a run, jumping lightly from rock to rock, though

INDUSTRIAL MEN IN CIVIC UNION

Southeastern and Vernon Association Formed

Will Work for Betterment of Factory Area

More Than One Hundred Firms Enrolled

Representatives of over 100 industries centered in Vernon and the surrounding territory, including the district east of Compton avenue and south of Ninth street, have banded themselves into a civic organization known as the Southeastern and Vernon Industrial Association.

William Henry of the Pioneer Paper Company has been named president, A. C. Denman of the Southern California Iron and Steel Company, vice-president, W. T. Morris, former president of the largest Chamber of Commerce, second vice-president. Mr. Buttress of the firm of Buttress & Morris is chairman of the Membership Committee.

Official point out that the industrial activity of Los Angeles has gone forward so rapidly that the district in which it is principally situated is destined to be a leader in the association's hope to obtain better service in water, telephones, transportation, fire protection and streets.

PURPOSE OF ASSOCIATION

The purpose of the association is to agree upon the order of importance of these needs, and to cooperate in obtaining them.

The merger of all industrial concerns may be directed toward the same end at the same time.

The organization is declared to be the first of its kind in Los Angeles and is cited as a demonstration of the spirit of co-operation between the prominent industrial leaders and the various municipal departments of Vernon and Los Angeles, which is believed to play a principal part in the development of the industrial center.

All firms which have not allied themselves with the new association are urged to do so.

The association has decided its first move shall be the opening of Alameda street through to Blasius street. Large property owners have donated to the city a shiny-foot right of way on the east side of Alameda street, thus insuring a wide thoroughfare, capable of helping all traffic southward from the harbor or northward from the heart of the industrial Los Angeles. The city is now acting in the matter of opening up Alameda street on the West side, and condemnation proceedings are in progress.

THE ASSOCIATION'S FOUNDERS

Among the concerns which helped to found the new association are the following:

Appointment of Mrs. Edna Betts Trask of Pasadena as chairman of the California women's committee in the campaign of Northwest. Total amount \$25,000. Endowment fund was announced yesterday in dispatches received from Chicago.

Mrs. Trask will work in conjunction with Harry O. Hart, who will conduct the general campaign for the endowment fund in California. Mrs. Carl R. Latham is national chairman of the women's campaign committee.

"Decrees on the cruelty charge," said Judge Summerfield.

LAUDS NEAR EAST RELIEF

Pastor, Back From Stricken Area, Pronounces Work America's Finest Philanthropy

During a three-months' tour of South Europe and Asia Minor closing last week, the Rev. Charles H. Emmons, 1038 North Hobart Boulevard, has had an unusual opportunity of personally viewing the work of American Near East Relief in the Mediterranean countries. For the information of the many Times readers who are friends of the relief cause a few of his observations are given herewith.

BY CHARLES H. EMMONS

To the people of Southern California I bring the story of newly found joys, the joy of seeing with my own eyes America's greatest work among the orphan children of the Near East, and the greater joy seen in the heartfelt thankfulness of thousands upon thousands of these boys and girls in the happy, healthy, winning self-support.

As a member of the American Goodwill Delegation to Greece, Turkey, Palestine and Syria to inspect the work of the American Near East Relief organization, I witnessed the spiritual and industrial operations.

Will Henry of the Pioneer Paper Company has been named president, A. C. Denman of the Southern California Iron and Steel Company, vice-president, W. T. Morris, former president of the largest Chamber of Commerce, second vice-president. Mr. Buttress of the firm of Buttress & Morris is chairman of the Membership Committee.

Official point out that the industrial activity of Los Angeles has gone forward so rapidly that the district in which it is principally situated is destined to be a leader in the association's hope to obtain better service in water, telephones, transportation, fire protection and streets.

PURPOSE OF ASSOCIATION

The purpose of the association is to agree upon the order of importance of these needs, and to cooperate in obtaining them.

The merger of all industrial concerns may be directed toward the same end at the same time.

The organization is declared to be the first of its kind in Los Angeles and is cited as a demonstration of the spirit of co-operation between the prominent industrial leaders and the various municipal departments of Vernon and Los Angeles, which is believed to play a principal part in the development of the industrial center.

All firms which have not allied themselves with the new association are urged to do so.

The association has decided its first move shall be the opening of Alameda street through to Blasius street. Large property owners have donated to the city a shiny-foot right of way on the east side of Alameda street, thus insuring a wide thoroughfare, capable of helping all traffic southward from the harbor or northward from the heart of the industrial Los Angeles. The city is now acting in the matter of opening up Alameda street on the West side, and condemnation proceedings are in progress.

THE ASSOCIATION'S FOUNDERS

Among the concerns which helped to found the new association are the following:

Appointment of Mrs. Edna Betts Trask of Pasadena as chairman of the California women's committee in the campaign of Northwest. Total amount \$25,000. Endowment fund was announced yesterday in dispatches received from Chicago.

Mrs. Trask will work in conjunction with Harry O. Hart, who will conduct the general campaign for the endowment fund in California. Mrs. Carl R. Latham is national chairman of the women's campaign committee.

"Decrees on the cruelty charge," said Judge Summerfield.

"I married you, did I?"

saided Judge Summerfield, when Julia Cantello appeared in his court asking for a divorce from Charles Cantello.

"Yes, Your Honor. It was in December, 1919. You said he didn't treat me right to come back."

"Sorry I didn't do a better job," said the court. "What's the trouble?"

"Well, he stayed with mother, and she put him on the board. I answered Julie, 'Or, if he did borrow it from me. And he wouldn't support me, either.'

"He swore at me in Italian. It was dreadful. And once he asked me to go to town. I didn't feel like it, and he hit me in the face with his fist. Then I sat down. Your Honor," she continued.

"Decrees on the cruelty charge," said Judge Summerfield.

"I'm glad you got mad as a wildcat strung up by tail!"

"Yes," was the answer.

"And called you name, did he?"

"And didn't take baths enough?"

"And stayed in the garage when your friends called?"

"Yes, sir."

"You came into the parlor with our community property, your honor," added Marie Mosquini, mother of the firm star, at the conclusion of her testimony in her divorce suit against Joseph Mosquini in Judge Summerfield's court.

"You say your husband got mad as a wildcat strung up by tail?"

"Yes," was the answer.

"And called you name, did he?"

"Oh, yes, he didn't indeed."

"And stayed in the garage when your friends called?"

"Yes, sir."

"Give her seventy-five per cent instead of the fifty per cent she asked for," said the court.

The property in question was valued at \$8000.

COLLECTIONS HERE IN LEAD

Southern California Ahead of Western States

Collector Goodcell Submits Impressive Figures

Relative Prosperity of This Section Emphasized

In the percentage of collections for the fiscal year 1922, compared with the corresponding period of 1921, Southern California leads every internal revenue district in twenty states west of the Mississippi, according to a report completed yesterday by Collector Goodcell.

The survey of Commissioner Blair shows that the average percentage of decrease in receipts in the twenty States was 25 per cent, against 4 per cent for the Los Angeles district. The decrease for the United States as a whole was 1 per cent.

The Los Angeles district collected more money than the combined receipts of eleven Western States added together. These States are Oregon, Washington, Idaho, Montana, Nevada, New Mexico, Wyoming, Utah, North Dakota, South Dakota and Hawaii.

The following percentages of decrease in the collections for the twenty States for the fiscal year 1922, as against 1921, reflects comparative business conditions. Collector Goodcell said it was noticeable that the States of California and Los Angeles registered the smallest percentage of loss in Federal revenue:

Los Angeles, 4 per cent; San Francisco, 18; Arizona, 22; Washington, 21; Nevada, 23; Texas, 24; South Dakota, 19; Oregon, 21; Colorado, 20; Kansas, 22; Missouri, 25; Nebraska, 27; Minnesota, 34; Hawaii, 73; Louisiana, 27; Arkansas, 18; Iowa, 27, and North Dakota, 21.

Confession sweeps country.

Man in Kalamazoo, Mich., confesses in a letter of letter criticizing modern methods of honest-to-goodness codfish. Kalamazoo citizens confess he rode home with his wife, but promises to do better next time. His conductor catches him, slightly drunk.

Senator Johnson in San Francisco, after reading Johnson's confession and Hardwick's confession confesses he suspected something from the very beginning. Senator Johnson has "ceased to be the head and front of the narcotic menace." Its place, he asserts, has been taken by morphine, cocaine and heroin.

"We hear from Europe," Capt. Hobson said, "that heroin has just been discovered by a German chemist, and that our police and criminologists must be on the lookout for its effect among criminals."

DESTRUCTIVE PARIS

"Unofficial advices are that the darker element of German strategy has been to destroy the French nation through cocaine."

Capt. Hobson declares that there is a "dope ring" or trust that it is international in its scope, and that its main exploitation objective is the United States. He maintains that the narcotic problem is a grave hazard to international amity.

"The controlling agency of this narcotic exploitation is centered upon America," Capt. Hobson said, "no doubt because the profits are greater. Our last comparative figures showed at the time that the United States, per capita, consumes 10 grains of opium, 20 grains of heroin, 30 grains of cocaine, 35 grains of morphine, 40 grains of heroin, 50 grains of cocaine, 60 grains of morphine, 70 grains of heroin, 80 grains of cocaine, 90 grains of morphine, 100 grains of heroin, 110 grains of cocaine, 120 grains of morphine, 130 grains of SUFFERING A RELAPSE

There are rumors that China is getting back into the opium habit. A returned missionary says that in several sections of the country the farmers have been assessed by the military governors on the basis of what their lands will produce in opium. Some of these military lords are actually paying their warriors in opium. Not since 1907, when the powers joined with the orientals in efforts to put down the opium traffic, has the drug habit been so firmly fixed as now. Largely from American laboratories morphine has been introduced into China and the addicts cherish it beyond their own crude product. It looks as if it would be some weeks ahead before we had a drugless world. For this America is as responsible as any nation, for we are turning out most of the preferred stuff in the dope line.

THE NEW POLAND

Poland is trying to arrange a loan of something like \$100,000,000 in London and a Cabinet Minister of the Polish government is now in the British capital to that end. The English branch of the Morgans was one of the banking houses visited, so that America may participate in the transaction. Paris is also asked to join. It is given out that the loan will be used to establish a huge government bank for the issuance of a permanent gold currency. Poland herself will contribute \$30,000,000 toward the capital and it is promised that, with the establishment of the bank, the printing of paper money will cease and the marks now in circulation will be retired. The financiers of the world are not offered interest on the loan. Instead they are invited to become stockholders in the bank and full participants in its profits. Thus the financial interests of the world would be virtually interested in maintaining the government as a going concern.

THE NEW COW

An announcement comes from the Michigan State Fair Association of Henry Ford's intention to develop a new brand of cattle. He wants a cow that is more efficient than a Jersey and yet will carry more meat than a Hereford. He has already created a line of milking Shorthorns that are to be the forbears of the new breed. The Michigan Agricultural College is to direct the achievement and the motor magnate will cover all costs. Henry declares that our cows and cattle as we know them now are not nearly as efficient as they should be. It is admitted that the line between beef and dairy cattle are very distinct at the present time.

One group of breeders has worked for years to produce the best milker, while another group has labored for generations in the pursuit of beef. As a result the two types are far apart. Henry Ford is going to take his trusty monkey wrench and assemble them. He is going to have a two-in-one cow. We will have a beastie that is a Guernsey at milking time, but stands up like a polled Angus when on the butcher's scales. Whether he can ever get into quantity production and turn out his all-purpose cattle at the rate he is assembling Fords is another question. Whenever Henry ventures into other fields there is a feeling that as a statesman or scientist he is the best builder of cheap buzz wagons we have.

NO HOLY WAR

The intense hostility that has broken out between Hindus and Mohammedans in the northern part of India spells the doom of the Holy War so confidently predicted by students of Asiatic affairs as sure to come in the next few years. In many cases riots of such serious nature between the two opposing sects have occurred that the British have been obliged to interfere.

Less than two years ago Gandhi was preaching the doctrine to Hindus and Mohammedans that in union there lay strength and the hope of throwing off the British yoke. The Mohammedan leader, Mahomed Ali, was sent to prison for protesting his adherence to this doctrine and it looked as though the days of religious prejudice were over. In the interim since Gandhi was imprisoned several things have conspired to shatter the edifice of tolerance and good will that he so carefully erected.

Chief of these, of course, was his removal from the scene of activity. He was the most influential person in favor of Hindu-Mohammedan unity. Secondly, the somewhat contemptuous manner in which the Angora government treated the Caliph, removing one and instating another with no display of the reverence formerly associated with the head of Mohammedanism, greatly injured the prestige of the sect among non-Mohammedans Indians.

The final blow to unity was struck when the recent electoral campaign for representation in the Indian legislative assemblies was inaugurated. The parties divided along religious lines, each sect furiously working for the election of its own members. The casual dislike flamed into hatred at this time and bloodshed began to result. Today the specter of a united India revolting against her rule no longer haunts Great Britain, but she has on her hands the gigantic task of restoring something that approximates peace between the two religious communities.

EDITOR MYERS
A The taxpayers are looking to City Auditor Myers to answer fully and definitely at least of the sixty-eight questions asked the Board of Public Service Commissioners by Mayor F. D. Parker of San Fernando, a heavy Los Angeles taxpayer, covering long-standing charges of alleged waste, extravagance and mismanagement in the handling of the millions of dollars received from taxpayers and consumers for the benefit of the Municipal Power Bureau. The board has to date refused to answer Mayor Parker's questions.

City Auditor Myers cannot afford to set himself up as an apologist for the commission, as he was elected to office by the people to be a watchdog of the public funds.

The City Council took cognizance of the charges against the commission at the time the board, while claiming that the Power Bureau was making millions in profits, admitted that the money drawer was empty and asked for and received a loan of \$500,000 from the city treasury in an effort to stave off bankruptcy. Will the City Auditor make a real investigation and a report that will mean something to the taxpayers or will he take refuge in technicalities and make one of those typical City Hall "investigations" which have become a costly joke to the taxpayers who pay the bills of the city government?

The responsibility rests upon the shoulders of City Auditor Myers. If he accepts it in the spirit which prompted the Council's instructions, as well as the letter of his order to investigate, then the City Auditor will, among other things, set forth in his report complete, truthful answers at least to Questions Nos. 5, 14, 15, 17, 24, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 37, 38, 39, 40, 41, 42, 43, 44, 46, 47, 48, 49, 50, 52, 53, 54, 55, 56, 57, 61, 62, 63, 64 and 65. Mayor Parker furnished to City Auditor Myers a copy of the list of sixty-eight questions asked the board and, as the commission apparently has no intention of answering them, it is up to City Auditor Myers to do so.

FOOLISH WORDS

Los Angeles citizens have genuine cause for disquiet if the selfish and foolish sentiments contained in an editorial in the September issue of the All City Employees' Bulletin actually represent, as they purport to do, the civic ideals and aspirations of the men and women employed in municipal departments.

The Times believes, however, that, instead of reflecting the spirit of the city's workers, this ridiculous utterance will be resented by city employees as unjustified, unwise and unauthorized. The editorial in question concerns itself with the submission of a proposed pension plan to the Board of Freeholders for incorporation in the new city charter.

After presenting potential difficulties in the path of obtaining approval of the specific plan the editorial proceeds:

"When doubling Thomasen lift their eyebrows in question of our ability to convince the Board of Freeholders, let alone the voters, of the justice of our claims and of the ability of the richest city in the world, in per capita taxable wealth, to pay those claimants back only to remind them that no charter can possibly pass unless the plan of organized city employees who conceive it to be contrary to their interests."

In another section of the employees' bulletin the statement appears that the city workers will "settle down to the job of raising \$20,000 they expect to spend to put the new charter over—if it contains this particular pension plan."

There is little occasion for doubt that the Board of Freeholders, after careful investigation and consideration, will write an equitable pension plan into the proposed new city charter if it appears wise and equitable for such a plan to appear therein. Nor is there any reason for believing that the people of Los Angeles, who have always been fond of foolish persons and to those who held positions of which they were underdressing.

We admit that doing things isn't so exciting—or so easy—as talking about them. Yet sometimes looking back over the unmaterialized ghosts of mighty undertakings, we regret the paucity of what the French call the "faire accompli."

So many plans, proposed, decreed!

So many projects never begun!

While just the sight of something done is all our all eyes need.

TAXATION

Taxes we have with us always and much of the time of our legislators is taken up with attempts to correct injustices or inequalities in old forms of taxation and devising new methods of reaching the citizen's pocketbook.

The Secretary of the Treasury has a commission of experts at work studying the entire tax problem in its relation to the general government. The research may be illuminating in the matter of supplying information, but that is no sign that any reform will result.

Congressman William R. Green of Aurora, Iowa, who seems to be slated for the chairmanship of the Ways and Means Committee of the House, has conferred with President Coolidge over the problems ahead.

He will again introduce his resolution which would provide a constitutional amendment prohibiting the issue of tax-exempt securities.

He is reported as not being in accord with Secretary Mellon or Congressman Madden, head of the Committee on Appropriations. The latter proposes a straight reduction in taxes each year in proportion to the government surplus as determined each season.

It is agreed, however, that there must be a simplification of the revenue laws. The income tax is so complicated and involved that it takes an army of trained experts to interpret and enforce. Even now the courts are clogged with appeal cases arising from unusual or unjust applications of the law.

So it may be seen that there is a lot of work before Congress or a dry and technical character, and yet of definite importance to most citizens.

The measure worked out by Congressmen Madden would provide for a reduction in taxes each calendar year to the extent of the government surplus in the preceding fiscal year. But no increase of taxes would be permitted in any year in which the income failed to meet expenditures. The government would be on short rations and its nose to the grindstone—which might do it good.

Every day the traffic situation grows worse and worse. Yet, if proposals were efficacious, manipulating the downtown streets of Los Angeles would be as simple as growing devil grass in a California lawn.

Every new proposal, however, declares all previous proposals to have been grossly inadequate. Then the new proposal is laid away in lavender till it, too, has acquired an inadequate mellowness.

Knowing the fate of all movements that become intricated in the long proposal, the average citizen must sometimes tremble for the solution of our traffic trouble.

The Second-street tunnel did finally emerge from the long proposal inception,

has one of the big men of the country.

CALL FOR LOWDEN

Although there is a persistent call for a popular leader to put the hobbles on Gov.

Len Small's administration in Illinois, Col.

Frank Lowden declines to be again a candidate for the absolute disposal of the last pan-

adorned. The Republicans of the State,

however, are determined to at least con-

tinue him as their favorite choice for the

Presidential office. They may be thor-

oughly loyal to the national administration, yet

they will show their loving regard for their

famous Governor by sending a solid Lowden

delegation to the national convention—as

they did in 1920. In him the Prairie State

has one of the big men of the country.

Still in the Saddle

[Louisville Courier Journal]

TWO MINUTES
OF OPTIMISM

BY HERMAN J. STICH

The Universal "Hes!"

Hans Christian Andersen, who in his fairy tales showed he knew more about people than almost any other writer, once wrote a story about two weavers who worked at a loom, pretending to weave cloth for their emperor's clothes. This cloth, they said, was made for all foolish persons and to those who held positions of which they were underdressing.

For a long time they succeeded in their trickery. For each person, seeing no cloth and believing this to be proof of his foolishness or his unworthiness, pretended to see and admire the beautiful fabrics which did not exist. The cat was finally let out of the bag by a little girl, who divulged the fact that the emperor wore no fine robes but his shirt—only!

I believe that the idea Old Hans wanted to put over, that the delightful fairy tale is the most important how important or how insignificant, how ordinary or how extraordinary, how big or how little your man—whether he is a mechanic, carpenter, porter, professor, preacher, teacher, judge, jurymen, bachelors, maid, husband, wife—from the best of us through the rest of us—is there an altar to Vanity at our threshold. And if you would hope for any favors at anyone's hands your chances are 1000 and more times augmented if you offer up some small sacrifice upon this shrine.

Ask any man who has done much interviewing and he will tell you that if you want to succeed as a statesman, in the heat of a bank or college or railroad or from any other eminent man—read his latest publication, base your request upon one of his "darn good ideas"—and he will always be "in."

An author, even if he is drowning and goes down for the third time, will probably come to the surface for a few seconds of life if you question him about his latest book.

Or course, this sort of thing must not, both should not, entail insincerity or servility, both of which are as despicable as they are tiresome and uninteresting. It is simply a recognition of the fact that diplomacy in its various phases is the good part of common sense—and that Vanity is the universal "heil."

An author, even if he is drowning and goes down for the third time, will probably come to the surface for a few seconds of life if you question him about his latest book.

It is simply a recognition of the fact that diplomacy in its various phases is the good part of common sense—and that Vanity is the universal "heil."

It has been suggested that if you recall the Universal "Hes!"

The present state of the public mind is not new. We had our "Soclees" Jerry Simms. A million male voters demanded the free and unlimited coinage of silver, the abolition of the national banking system, the issue of sufficient money to transact the business of the country on a cash basis, the government loaning money at 2 per cent on agricultural products. The farmers of the past have learned their lesson. The time has come when another generation must undergo the same educational experience.

MANITY URGED TO LIFT EYES TO HIGHER DEITY

"Gods in Image of Man" Decreed in Radio Sermon From KJH
by Dr. Martin

Humanity has too long made gods in the image of man and that the crying need of the world today is to open their spiritual eyes and look up to a Deity who is in beauty, love and power all the petty conceptions of man, Rev. Willie Martin, pastor of the First Methodist Church of Hollywood, preached a brilliant sermon yesterday at KJH audience from The Times broadcasting station,

the subject, "A Giant God," Dr. Martin spoke,

as follows:

"Every true minister of the Gospel who reads the Demonstrations of the Day of Pentecost covets in rich measure the power that was manifested through the preaching of a humble Galilean named Peter. A man who was a man who had denied his Master, now displayed heroic courage and swayed the multitudes with amazing results. The seed sown by the Spirit of God is interesting to note the contents of that sermon. The preacher had a lot to say about Christ. It set forth the great facts concerning His resurrection. His sacrifice. His death. His resurrection and His king rule. The preacher today who forgets that main point is a pretender to Jesus Christ and his Gospel may retain popularity but he is certain to be a weak instrumental in the salvation of souls."

THINKS MILLENNIUM IS CLOSE AT HAND

James C. Watt spoke at Trinity Auditorium yesterday on "The Coming of the Kingdom." He said in part:

"Life, liberty and happiness lie at the very foundation of human desires and governments of all ages have functioned in an endeavor to realize in as large a measure as possible the fundamental rights of man. But there is a great difference between the way in which the world system is designed to do this and the way in which the Kingdom of God is designed to do this."

The world system is designed to do this and the Kingdom of God is designed to do this.

When we parents are using our greater strength and privilege for whipping our sons for a sort of people, we ourselves are failing in our children's eyes.

At the same time, the Kingdom of God is designed to do this and the world system is designed to do this.

When we parents are using our greater strength and privilege for whipping our sons for a sort of people, we ourselves are failing in our children's eyes.

At the same time, the Kingdom of God is designed to do this and the world system is designed to do this.

The Woman and Her Job

(Question of general interest bearing on vocational training of women and their employment problems will be answered by Mrs. Walter Perry Story in this column.)

SOCIETY

BY CORA YOUNG

Mr. and Mrs. Walston G. Smith of Juneau, Alaska, announce the engagement of their daughter Helen to Mr. John Tufts Case of this city. Miss Smith attended the University of California and is a member of the Alpha Omicron Pi sorority. Mr. Case is a young architect, the son of Mr. and Mrs. A. B. Case of South Pasadena. He was a student at the University of California where he met Miss Smith. Mr. Case is a member of the Zeta Psi at Occidental and is a graduate in Juneau in the spring.

UP FROM THE RANKS

Stories told in this column have dealt with the achievements of girls in the business world, to a large extent, because the problems of those trying to rise from the ranks are more generally known than the progress of women from the shadows of obscurity.

But this latter class is the more interesting because of the measure equipment with which the start has been made.

Such a one is now the president of a large hotel company in a northern city. Her beginning nearly room was filled, and another was as humble in comparison with her present surroundings. Her journey has all the elements of a fairy tale. But let me tell you the story as it was told to me.

Twenty years ago, when she was twenty, if my narrator knew the facts, came from Scotland and entered the service of a doctor. Her predecessors as cook and maid of all work had been numerous, but this girl was said: "She has the gift."

Cooks are born, but she had other attributes as priceless as price. She was no more wretched in the large of her body than she would have been in her own, and she had the thrift that comes from lean years on barren soil.

Now there is a great difference between a thirty-dollar maid and a maid who has been numbed by waste and extravagance.

The chief of this chain is a high-class hotel catering to transients only; the smaller houses have many permanent guests at attractive rates, but each has an atmosphere of "homey" comfort.

A few years afterward a company was formed, of which she was the president, and a splendid hostelry bearing her name was opened. This company now controls four hundred hotels in the heart of the business district.

NEWS OF SOUTHERN COUNTIES

FRESNO LIQUOR SPY TO GET PAY

County Auditor Announces Approval of Claim

Supervisors Dispute Auto Fee Distribution

Method of Apportionment Remains Undecided

EXCLUSIVE DISPATCH
FRESNO, Sept. 23.—William Kelly, County Auditor, has announced that he will allow the compensation claim of Andrew Tadlock, former Fresno county "stool pigeon," in connection with various liquor cases. Tadlock worked for Dist. Atty. George R. Lovoy and presented a bill of \$556. The Board of Supervisors approved the claim after it was approved by Lovoy.

DISAGREE ON AUTO FEES

Distribution of more than \$200,000 apportioned to Fresno county by the State Motor Vehicle Department has excited lively discussion by the Board of Supervisors.

Supervisor Robert Leched held that the money should be distributed according to the number of automobiles registered. Supervisor N. P. Gossner supported the old system of prorating the funds on a basis of valuation.

No vote had been taken.

RAILYARD CROP MOVING

Rapid movement of the 1923 crop of raisins is anticipated by the Sun-Maid Raisin Growers. This outlook was voiced in reports given the Fresno unit at a meeting in the City Hall.

Growers informed that the 1923 raisin raisins were being moved rapidly.

The tray count and raisin delivery for this year were discussed. An increase of 10 per cent in tray count in an estimate Sun-Maid to approximate 1923 tonnage was emphasized.

It was stated that the raisins from the 1923 crop were being disposed of and that 80 per cent of the sweat boxes tied up in storage will be released by October 1, and the remainder shortly afterward.

CAN SHORTAGE ACUTE

Shortage of refrigerated cars was acute today. It was announced by the Pacific Fruit Express yesterday that it would spot 125 cars last night. Yesterday, with orders for 373 cars, 106 cars were spotted.

DISTRICT FAIR OPENS

The Fresno District Fair will open tomorrow at noon with an exhibition of soil culture and its allied industries. Great preparations have been made for the entertainment of unusually large crowds. The San Joaquin Valley is represented. The closing feature will be the 150-mile automobile race next Saturday.

Heavy Damages Are Asked by Widowed Pair

EXCLUSIVE DISPATCH

SOUTH BERNARDINO, Sept. 23.—Damages totaling \$109,000 are asked by the widows of Firemen Cleveland Palmer and Brakeman H. E. Hamlin, killed in the same train as it ran wild down the Cajon Pass two months ago, according to suit on file in the Superior Court.

Mrs. Palmer in her complaint to the court ascribes the responsibility for the wreck, one of the most sensational in California railway history, to defective equipment. She also charged that the train "mismanaged failed to maintain in a proper and safe condition airbrake equipment" and asks \$76,000 damages. Her late husband was instantly killed as the locomotive was thrown seventy-five feet from the track as the train, traveling nearly seventy miles an hour, hit a sharp curve in the mountains.

Mrs. Hamlin seeks \$33,000 damages and bases her complaint on virtually the same grounds as Mrs. Palmer.

In the wreck twenty-six of the thirty cars comprising the freight train, including the locomotive buried in a hillside and the two trains killed, as the train piled up after running wild down the grade for four miles, the last mile and a half being particularly noticed.

Mae Marsh, Iver Novello, Carol Dempster and Neil Hamilton head the cast.

SCHOOL READY TO OPEN

Christian Workers' Institution Will Begin Year Tuesday

LOCAL CORRESPONDENCE

HUNTINGTON PARK, Sept. 23.—Arrangements have been completed for the school year of the Training School for Christian Workers, which will begin Tuesday morning. The day will be divided to special programs in the morning and at night, one of the features being a musical program.

In the morning the main address will be delivered by the new president, Louis H. Coote, who recently arrived here from Marion, Ind. At night Rev. William Kirby of Long Beach will speak.

It is planned to hold school each Thursday night at 7:30 o'clock. The speaker for the first Thursday night the 27th, inst., will be Rev. Fred Ross of Los Angeles. The regular school year will begin at 4:30 a.m. Wednesday.

According to President Coote, the prospects are splendid for a successful school year.

FEDERATION PLANS BAZAAR

LOCAL CORRESPONDENCE

SOUTH PASADENA, Sept. 23.—Welfare activities of the South Pasadena Parent-Teacher Federation for the coming year will be held at High School No. 1, according to an announcement made by Mrs. William Ingoldsby of 831 Milan avenue, president of the association.

BANDIT ORDERS "PUT 'EM DOWN"

Courteous Road Agents Also Praise to Bid His Victim Farewell

EXCLUSIVE DISPATCH
SAN BERNARDINO, Sept. 23.—And now comes the lone bandit who smilingly requests his victim not to put up their hands.

San Bernardino officers today were searching for the courteous bandit, who late last night robbed L. A. Ranney, a service-station operator, of \$15 in small change and, through his own politeness, overlooked \$30 in currency.

The bandit entered the service-station, quickly drawing a revolver. Ranney held up his hands. "Oh, put down your hands, that's old stuff," said the bandit, who then demanded that Ranney "fork over" his money. Ranney handed the bandit a money sack. The bandit jugged the sack and left. In his pocket, Ranney had \$30 in his pocket.

A few yards out of the station, the bandit turned to say farewell adding, "I might see you again some time."

ORANGE TO HAVE NEW ROPE MILL

Building Permit Issued for Factory of Western Cordage Company

LOCAL CORRESPONDENCE

ORANGE, Sept. 23.—Adding another major industry to the community, a \$100,000 industrial district, the Western Cordage Company's \$125,000 manila rope factory, is expected to be in operation by December 1.

This prophecy was made by rope factory officials here today following the issuance by the city building department of a \$2,000 permit for the construction of the factory plant.

The permit shows that the construction contract has been awarded to the Moran Company of Los Angeles, which owns the Western Cordage Company's factory near by. The new factory will be of brick with numerous steel gash windows. It will be located on Cypress street. The dimensions are 96x120 feet with provisions for future expansion.

Workers have begun the task of clearing the site of trees, laying the foundation. Actual construction work is expected to start next week. The contract stipulates that the structure must be completed within sixty working days.

O. E. Eller, president of the rope concern, is here to inspect the building machinery for the new factory, which is scheduled to arrive within the next fifty days.

"We anticipate launching operations by December 1," said an official, adding that a large number of orders for rope have been received.

LOOK TO RECORD RUN FOR 'COVERED WAGON'

With six capacity months behind it, and every motion-picture world watching, "The Covered Wagon" failed to maintain a proper and safe condition airbrake equipment" and asks \$76,000 damages. Her late husband was instantly killed as the locomotive was thrown seventy-five feet from the track as the train, traveling nearly seventy miles an hour, hit a sharp curve in the mountains.

Mrs. Hamlin seeks \$33,000 damages and bases her complaint on virtually the same grounds as Mrs. Palmer.

In the wreck twenty-six of the thirty cars comprising the freight train, including the locomotive buried in a hillside and the two trains killed, as the train piled up after running wild down the grade for four miles, the last mile and a half being particularly noticed.

HUMAN WRECKAGE IN

RETURN ENGAGEMENT

LOCAL CORRESPONDENCE

HUNTINGTON PARK, Sept. 23.—Arrangements have been completed for the school year of the Training School for Christian Workers, which will begin Tuesday morning. The day will be divided to special programs in the morning and at night, one of the features being a musical program.

In the morning the main address will be delivered by the new president, Louis H. Coote, who recently arrived here from Marion, Ind. At night Rev. William Kirby of Long Beach will speak.

It is planned to hold school each Thursday night at 7:30 o'clock.

The speaker for the first Thursday night the 27th, inst., will be Rev. Fred Ross of Los Angeles.

The regular school year will begin at 4:30 a.m. Wednesday.

According to President Coote, the prospects are splendid for a successful school year.

CRITERION IS MADE READY FOR OPENING

The premier of Charles Chaplin's production, "A Woman of Paris," will be staged next Wednesday evening, coincident with the dedication of the Criterion Theater as a two-a-day house.

Dress rehearsals are being started tonight and the doors of the Criterion will be locked while the curtain goes up.

Charles Chaplin and his organization of symphony artists are rehearsing the magnificent score for the picture.

Charles Chaplin is personally supervising the famous piano prelude with its cast of artists.

The entire cast of "A Woman of Paris" will appear in person on the opening night.

EXCLUSIVE DISPATCH

SANTA FE SHOP JOB AWARDED

El Paso Firm Gets First Contract Under Railway's Big Extension Program

EXCLUSIVE DISPATCH

SAN BERNARDINO, Sept. 23.—Contract for the erection of a \$70,000 pipe and tip shop, the first unit of the Santa Fe Railway's proposed \$2,000,000 extension program for 1924, has been awarded to railway contractors of El Paso. It was announced today.

Construction of the new shop on the adjoining units of the locomotive department in the shop yards will begin early in October.

Erection of a new boiler shop to replace the antiquated building will be completed by September 1, is scheduled to begin before 1924, and smaller units of the department will be built within a few months.

The appropriation of \$100,000 by which the capacity of the shops and its employed personnel doubled was announced early in the spring by officials.

The new shop will become the largest on the Santa Fe Railway, officials assert. All repair work on locomotives and cars operated west of Albuquerque will be handled by the El Paso yard.

The new El Paso workshop location gives it a special interest in the Coast Highway, which perhaps no other city along the route can receive, it is believed.

It is the opinion expressed by N. T. Edwards, this city member of the State Highway Commission,

LITTLE INDIANS GET AID

Orphan Outcasts at Bakersfield Benefit From War Risk Insurance Left by Half Brother

EXCLUSIVE DISPATCH

BAKERSFIELD, Sept. 23.—Mary Scott, 14-year-old Weldon girl, and her younger brother, Willis, 12, and Jerry, aged 10, are probably the wealthiest Indian children in Kern county. The children were orphaned several years ago through the death of their white father and half-Indian mother. They became dependent upon friends in the mountain region, where they made their home.

Meanwhile, Jim Skinner, half-brother of Mary and Jerry and Willis, had enlisted in the United States Army. He died of influenza at Camp Lewis. He had taken \$10,000 of war risk insurance, leaving his full sister as beneficiary. Jim's brother had died, leaving as next of kin his widow.

The Pacific Electric is considering tearing up the tracks running on Brookside avenue from Orange street to San Mateo street, and if this is done the Trustee plans to make this one of the most beautiful streets in the city. There is a row of pepper trees down the center of the broad avenue, and if the car tracks are taken up grass will be planted and a parking made. This is one of the main avenues in the city.

Friends of the orphan children, though the insurance should go to the care of the little Scotts, but the entitled lawyers were told the children would be paid Jim's wife's husband instead.

Weldon workers in Bakersfield took up the matter and sent affidavits to Washington, and the money was secured for them.

The money is paid in monthly installments of \$75.60, and helps to support the Scotts in school.

Miss Jessie E. Morgan, county welfare commissioner, is guardian of the children. At the rate of payment, it is estimated the \$10,000 will sustain the family until they are able to care for themselves.

Mary entered high school as a freshman this year, and is chumming with Elydia Vasquez, the first Tejon Indian girl to come to a Kern county high school.

NEW COAST ROAD TO AID LONG BEACH

Highway Commissioner Tells Benefits the Scenic Boulevard Will Bring

LOCAL CORRESPONDENCE

ORANGE, Sept. 23.—Completion of the new Coast Highway, which will eventually connect Mexico with Canada, will prove a distinct asset to all of Southern California, particularly to Long Beach. This is the opinion expressed by N. T. Edwards, this city member of the State Highway Commission.

The new highway, which begins at the Santa Ana River, will be a great boon to Long Beach.

"It is the opinion of the highway commission that the new highway will be a special interest in the Coast Highway, and there will be benefits according to Long Beach which perhaps no other city along the route can receive, it is believed.

The highway commission will be charged to the city of Long Beach to make the city first class in every respect.

SCOUTS TO GATHER AT SANTA BARBARA

LOCAL CORRESPONDENCE

HUNTINGTON PARK, Sept. 23.—Twenty to 80 per cent increases in church attendance are reported by various ministers since the opening of the fall season. This is the largest growth in church-going in the country, it is said.

The ministers themselves are at a loss to decide whether the growth is due to increased interest in things religious or to growth in population. It is said, however, that the increase of attendance is greater than the growth of population.

IT GOES WITHOUT SAYING

"It goes without saying that the State Highway Commission is not looking to the advantages of any particular town in the city, but it is the opinion of any town in the state that it is the fact that Long Beach happens to occupy a splendid location on the new highway which is going to make the Coast road great as well."

ROAD NEEDS REPAIR

Commissioner Edwards also expressed the opinion that Long Beach should use all possible legitimate pressure on the Los Angeles county supervisors to get the road repaired.

The new highway has been completed to the end of the first mile, and the road is in excellent condition.

It is the opinion of the highway commission that the new highway will be required for betterment of the city filters. New hydrants would be required to give protection to the police department.

The trust will act on the proposal at a later meeting.

WATER BONDS ASKED

Caliceto Wants Larger Mains and More Hydrants

LOCAL CORRESPONDENCE

ORANGE, Sept. 23.—Demands for increasing the facilities of the city water system have resulted in the consideration by the trustees of a bond issue of \$15,000.

Commissioner Edwards has prepared a comprehensive plan for improvement of the water system and calls for numerous extensions of mains and introduction of new hydrants.

It is the opinion of the commissioners that the new hydrants will be required for betterment of the city filters. New hydrants would be required to give protection to the police department.

The trust will act on the proposal at a later meeting.
